Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is in response to applicant's amendments and request for continued examination submitted 21 December 2006.

Priority

1. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

The later-filed application must be an application for a patent for an invention which is also disclosed in the prior application (the parent or original nonprovisional application or provisional application). The disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

The disclosure of the prior-filed application, Application No. 09/070829, fails to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application. The 09/070829 application does not contain subject matter relating to the elongated arm being fixedly connected to the needle retainer. Since this limitation is found in the elected species, the application will be given a priority date of 20 March 2000, which is the filing date of application 09/526612.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1,3-6,8-10,14, and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Moulton et al (US 6,086,563).

Regarding claims 1,3-6,8-10,14, and 20 Moulton teaches a medical device comprising a hollow housing (20), a needle (30), a catheter (60,63), a biasing element (vacuum created by 45), a needle retainer (40) with a flashback chamber (42) and elongated arm (41) engaging the catheter.

4. Claims 1,3,5-10, 14,15,17, and 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Flumene et al (US 5,562,634).

Flumene teaches a medical device comprising a hollow housing (2), a needle (15), a catheter (17), a biasing element (14), a needle retainer (7) with a flashback chamber (42) and elongated arm (7a,10) engaging the catheter. Regarding claim 6, the housing arm 6 could be pressed inwardly following removal of the catheter to prevent the needle from retracting.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Flumene as applied to claim 15 above, and further in view of Moulton.

Flumene teaches the claimed invention except for a flashback chamber integrally formed with the needle retainer.

Moulton teaches a catheter insertion device with a flashback chamber (42) integrally formed with the needle retainer (40).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to include a flashback chamber in order to provide the user with a means for indicating that the needle has been inserted into a blood vessel.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 3-10, 14, 15, and 17-19 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth R. MacNeill whose telephone number is (571)-272-9970. The examiner can normally be reached on 7:00-3:30pm M-F.
